

the best just got smaller

Now John Deere brings proven reliability to lower horsepower diesels. Introducing the Series 220. 21-54 hp engines that were born to run in a wide variety of applications.

These compact powerplants provide substantial weight and size advantages to equipment designers. And quiet, reliable, efficient performance to end users.

Choose from five new models, available in ready-to-install industrial power units, gen-set and industrial engine configurations. All are backed by John Deere warranties and product support. And that's no small advantage.

For more information, see your John Deere engine distributor. Or contact Deere Power Systems, P.O. Box 5100, Waterloo, IA 50704-5100. 1-800-328-0016 (Ext. 400).
