

We Don't Believe a Hospital Should Nickel and Dime Its Patients to Debt.

TRINITY  MEMORIAL HOSPITAL

For the Life of You.

Trinity Memorial Hospital isn't taking rising costs lying down.

Instead, we're taking a stand for you by making hospital bills easier to live with.

It's all part of our program for controlling costs without cutting corners. That program starts at the

door, with pre-admission (and post-discharge) testing. We pioneered this program in Wisconsin and it has helped us trim down treatment time and slim down treatment costs.

We're also committed to using a third-party review of our admis-

sions, to assure proper use of our hospital. In fact, we've taken such a stand against rising costs that our rates have stood pat in three of the last five years.

That's why, once we get you back to health, you have a better chance of landing on your feet.
