

T H E R E ' S

Windows are more than just holes in the wall, filled with glass. The very best windows offer year round beauty and energy efficiency. With True Oak®

M O R E T O

interiors, bright brass hardware and outstanding thermal performance. In a mind-boggling variety of sizes, shapes and colors. They boast fantastic

S E E I N A

attention to detail on every sash lock, every contour, every piece of trim. We know. Because that's how we build Weather Shield windows — the

W E A T H E R

most complete line of standard windows available. But we don't stop there. Our custom capabilities are unsurpassed in the industry. And when it

S H I E L D

comes to details, we never cut corners. We insist on using screws, not nails, which gives our windows a more secure fit. So, if you feel stifled by the

W I N D O W .

products most window companies offer, read on. And when you're through, we think you'll agree, there's more to see in a Weather Shield Window.

# THE INTELLIGENT CHOICE

## **SUPERSMART™ HIGH-PERFORMANCE WOOD WINDOWS AND DOORS**

With an R-factor of 6.67, Weather Shield's Supersmart windows and doors are some of the most energy efficient windows available.

Thanks to a unique sash design, these windows can be triple glazed, allowing for two air-spaces filled with Argon gas. In addition, two surfaces are coated with a softcoat Low E. These Low E coatings not only reduce heating and cooling costs, they reflect 95% of the sun's damaging UV rays. As a result, these windows block out both the January cold and the July heat.

In short, Supersmart wood windows and doors make your life more enjoyable. Which makes them the smart choice for you.

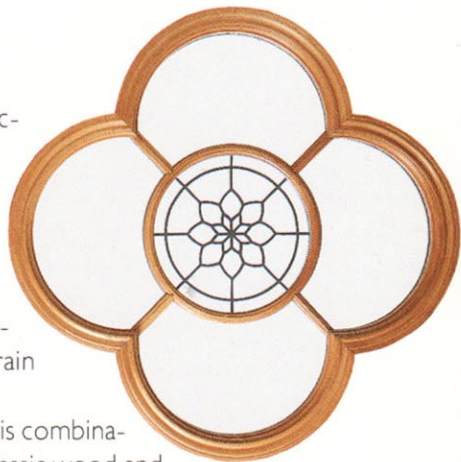

## **NO MORE PINING FOR OAK.**

No other wood has the reputation for strength and durability that oak has. Yet most window companies still only offer pine interiors.

In fact, Weather Shield is the

only major manufacturer that offers True Oak® as an option. We even offer polished brass hardware to complement and enhance oak's rich grain and deep texture.

Together, this combination of classic wood and bright brass adds an exquisite touch to any building or remodeling project.

## **THE CHOICE IS CLEAR.**

Want a window that stays cleaner longer than any other window on the market? Then you want Kleen-Shield,\*\* a revolutionary new idea in windows from Weather Shield.

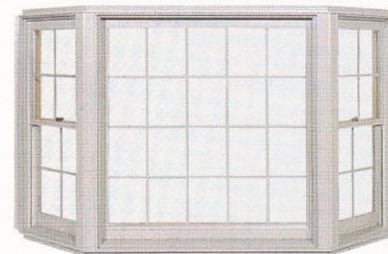

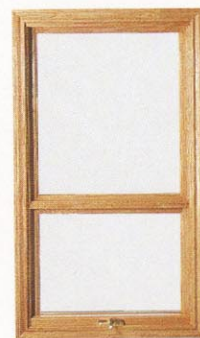

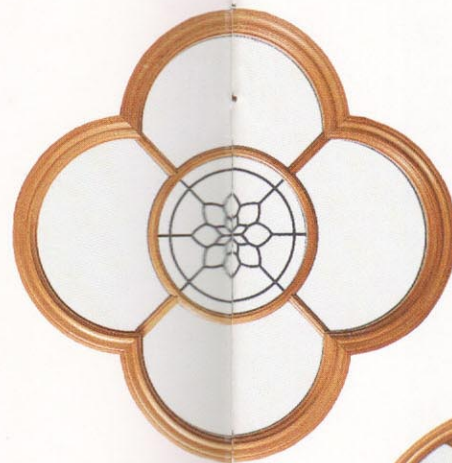

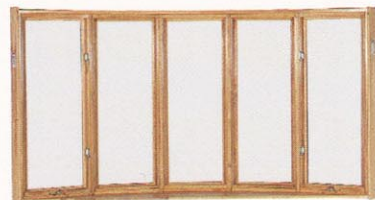

Kleen-Shield is a long-lasting, factory-applied, and completely transparent liquid polymer. When it chemically bonds with glass, it creates a non-stick, static-free surface.

As a result, not only do Kleen-Shield windows resist dirt and dust, they also come clean with very little effort. And that's a difference anyone can appreciate.

\*Kleen-Shield is Weather Shield's name for "Clear-Shield®" — a dirt-resistant polymer coating.

# CHOOSE FOR YOURSELF

Weather Shield windows and doors offer interiors in pine or oak. With exteriors clad in vinyl, aluminum, or finished with primer or a long-lasting Poly I finish.

## **Tilt Windows.**

Double hung windows with sash that slide up and down for ventilation and tilt inward for easy cleaning.

## **Casement Windows.**

Single sash windows, hinged on the side to crank open for maximum ventilation and easy cleaning.

## **Bay Windows.**

Picture window flanked by angled windows, extends outward from your house providing a panoramic view.

No one offers more than Weather Shield. More styles, shapes and sizes. More exteriors and glazing options. More attention to detail. Weather Shield carefully designs and engineers every window and door for superior performance. Some window companies don't. Weather Shield offers oak interiors as an option. Most companies

offer only pine.

Weather Shield maintains incredibly tight tolerances when extruding vinyl cladding. Most others don't even come close.

In short, we pay attention to a lot of things other window companies ignore. Which is why there's more to see in a Weather Shield.

## **Bow Windows.**

Casement windows, gently curved into an arch extending outward from your house, offering a 180° vista.

## **Circle Top Windows.**

Rounded windows that may be placed atop windows and doors as accent pieces, or used alone.

## **Direct-Set Windows.**

Stationary windows placed directly into a frame.

## **Skylites.**

Energy efficient stationary or venting windows.

## **Patio Doors.**

Energy efficient glassed doors available in sliding or hinged styles.

## **Entryway Doors.**

Distinctively designed steel insulated doors, some with beveled, leaded glass.

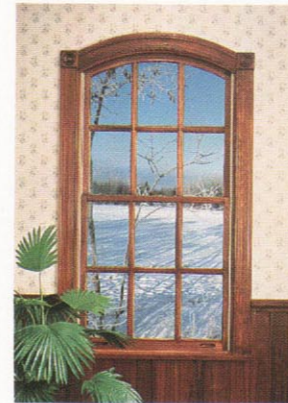

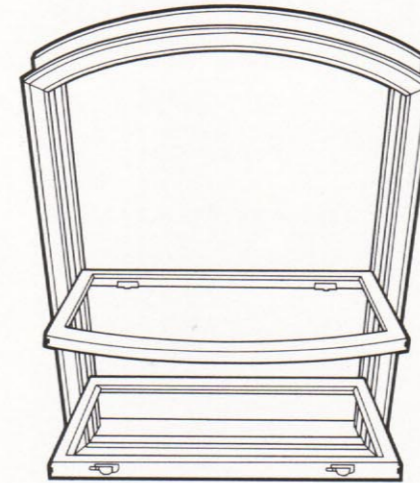

**TILT WINDOWS**

**WINDOWS THAT GIVE CONVENIENCE A NEW SLANT.**

It's a classic double hung with a big difference — the sash slide up and down and pivot inward. So when it's time to clean, forget about the ladder. Just tilt the sash toward you and clean both sides of the window from inside your house.

**CATCH A COOL BREEZE.**

But easy cleaning isn't the only advantage. You can adjust both sash to allow for maximum ventilation. Weather Shield's special block and tackle system will hold your sash in any position.

- ▲ **Double hung sash** slide up and down for convenient ventilation, tilt inward for easy cleaning.
- ◀ **Eye-brow tilts** can give any room a sense of grace, majesty and distinction.

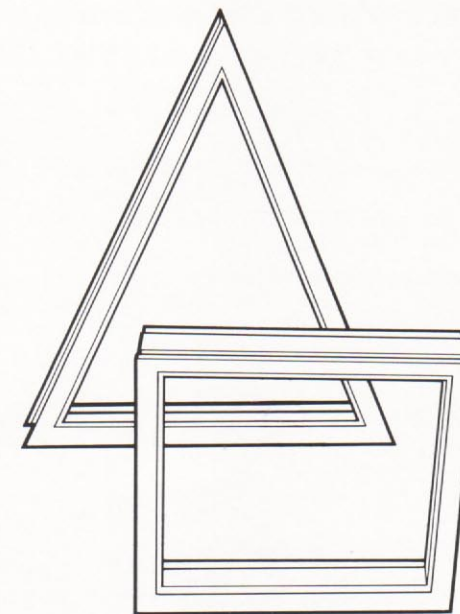

**BEAUTY THAT LASTS.**

Choose from a wide variety of exterior finishes and glazing options, with grilles or classic Williamsburg True Divided Lites. Each window comes with factory-installed security sash lock, superior weather stripping, and wood sash parts that are treated prior to assembly with a water-repellent preservative.

**DIRECT-SETS**

▲ **We offer Stationary Direct-Sets** in a variety of shapes to enhance any home's architectural style.

▶ **Weather Shield Direct-Sets** are instrumental to this home's big, bold visual impact.

## **STATIONARY WINDOWS THAT WILL MOVE YOU.**

Picture-perfect windows. That's one way to describe Weather Shield's direct-set line. These fixed windows are manufactured to the same high standards as our other window products, and they can add a distinctive touch to any home.

### **ALL SHAPES AND SIZES.**

Weather Shield direct-set windows come in all shapes and sizes, including triangles, octagons, trapezoids, and parallelograms. In fact, our custom capabilities expand decorative possibilities far beyond the conventional.

### **A CUSTOM DESIGNER'S DREAM.**

Direct-set units may be used singly, combined to create an entire wall of glass, or arranged with any of our other beautiful wood windows and doors for a custom design look. With exterior trim available in various widths to offer your architect or designer more options for unique design. So let your imagination take flight.
